HARLEQUIN STUDIO is one of our special hardwearing floorcoverings designed for dance, studio and stage use. Produced in rolls it is a complex vinyl construction incorporating a strong mineral fiber interply and a firm foam backing. The surface is produced from a hard-wearing vinyl and its formulation focuses on the demands of dancers. The result is a slip-resistant floor to reassure performers and a predictable surface to give confidence to dancers for demanding choreography and movement. The firm but lightweight foam backing helps to protect against hard subfloors.

HARLEQUIN STUDIO weighs only 4.8 lbs per square yard, yet stays firmly in place on the floor and is excellent for touring. It can be laid on any hard, smooth surface, e.g. particle board, hardwood, terrazzo, cement, vinyl tile etc. It is an excellent surface for a sprung subfloor.

HARLEQUIN STUDIO may be (1) loose-laid, (2) "semi-permanently" laid or (3) permanently laid. We also supply appropriate adhesive dancefloor tapes and gaffer tapes - single and double-sided. For more information regarding laying adhesives, cleaning, maintenance and storage, please contact any of our offices.

HARLEQUIN STUDIO is specified worldwide by major dance companies, private studios, schools and universities, theaters and broadcasting companies. HARLEQUIN will be delighted to furnish a list of users on request.

Harlequin Studio is just one of a unique range of floorings we produce. Be sure to ask about the full range of Harlequin floors for the performing arts: dance, theater, opera, shows and concerts, TV/film studios, exhibitions and displays.
